

Hand-Color Your Greeting Cards

- 1 Strathmore Creative Cards are great for all kinds of artwork—drawing, painting and collage. Reproducing an image on them makes it easy to produce multiple cards quickly and allows unlimited customizing possibilities.
- 2 Scan your drawing or put a digital photo on your computer. Using the custom print setting, print your design onto Strathmore Creative Cards.
- 3 We hand-colored the cards using watercolor pencils. Any kind of colored pencils, markers or light watercolor washes would work as well. You can make a series of cards that are all basically the same, or try different media and colors on the same image for fun.
