

ACRYLIC COLOR

Experiment with Color!

This simple twelve-row, twelve-column mixing chart suggests the possibilities of the **DANIEL SMITH** Ultimate Acrylic Mixing Set. Since **DANIEL SMITH** colors are so heavily pigmented, we added some acrylic medium when making our mixtures. Each row highlights the color in that row and what the other colors in the set do when mixed with the dominant row color. Each column contains the same colors in the same order as in the rows. For best results, play with the color mixing ratios—you'll be amazed at the range of colors you create. **Paint and Enjoy!**

DANIEL SMITH

	Hansa Yell. Medium	Perinone Orange	Organic Vermilion	Quin. Pink	Quin. Magenta	Carbazole Violet	Ultramar. Blue	Phthalo Blue (GS)	Phthalo Green (BS)	Perm. Green Light	Titanium White	Mars Black
